

First 3 TikTok Scripts, Ready to Film

BrandGoblin AI, July 5, 2026

Print this or keep it open on your phone. Everything in a code box is copy-paste ready: hook text goes on screen in CapCut, captions and pinned comments paste straight into TikTok.

READY TO FILM THIS WEEK — First 3 Scripts

(Written by the tiktok-strategist July 5, 2026 from TIKTOK_MASTERY_FROM_SCRATCH_2026.md. These are the beginner opening set: static Nix PNG + Fox voiceover + screen recording, so they need NO rig. Every one shows the brand-kit reveal. Filming order below adds one new skill per video. Post order per the acquisition plan: Scripts 1 and 2 on Day 4, Script 3 on Day 6. CTA is written for pre-1,000-followers, so “search BrandGoblin AI” + pinned comment. Swap in “link in bio” once the clickable link is live. No em dashes, plain punctuation.)

Before you record: have 3 to 4 brand kits already generated and screen-recorded in the app (one absurd, one normal-but-cute like the dog coffee shop, one for the before/after), plus the approved static Nix PNG and a scrap-paper bad logo drawing. Then you are only recording voiceover and editing.

SCRIPT 1 — “The world’s dumbest business idea”

Format: Format 1, absurd-idea demo (your bread and butter, post 3 to 4x/week). Pure screen-record + voiceover, no props, no face on camera. **Length:** ~23s.

On-screen hook (frame 1):

I gave an AI goblin the dumbest business idea I could think of.

Shot by shot: - 0:00-0:03 App idea box, finger typing “gym... for ghosts.” Trending sound at 15% under. - 0:03-0:05 Tap Generate, cut to loading beat. - 0:05-0:16 Reveal montage, one element every 2s: name, tagline, palette, logo, sample post. Zoom the best detail. - 0:16-0:21 Finished kit sits, static Nix PNG slides in from bottom corner. - 0:21-0:23 Hard cut to black on Nix’s last word. No outro.

Voiceover:

(Fox, natural, slightly fast) I typed "a gym for ghosts" into this thing. Watch.
(Fox, reacting as it reveals) Okay the name is actually good. There's a tagline. It picked
(Nix, bright and cheeky, on the pop-in) Told you. Next idea.

Spoken CTA (over last shot):

(Fox) It's free, no card. Search BrandGoblin AI.

Caption:

A full brand from one dumb sentence. What should Nix build next? Drop your idea below. #s

Pinned comment (post right after):

Made this in the app, it's free and there's no card. brandgoblinai.com. Comment an idea a

SCRIPT 2 — “Comment an idea and Nix will brand it”

Format: Format 1 variant, comment-loop starter. This is the bait that fills your comment section, which becomes your week-2 content supply (your best conversion format). Same easy shoot as Script 1. **Length:** ~20s.

On-screen hook (frame 1):

Comment a business idea. Any idea. Nix will brand the whole thing.

Shot by shot: - 0:00-0:03 Idea box, typing “a coffee shop for dogs.” Sound low under. - 0:03-0:05 Tap Generate, cut to loading beat. - 0:05-0:14 Reveal montage: name, tagline, colors, logo, sample post, one every 2s. Quick zoom on the logo. - 0:14-0:18 Full kit on screen, static Nix PNG pops in the corner. - 0:18-0:20 Cut.

Voiceover:

(Fox, inviting, like starting a game) Here is the deal. You comment a business idea, and
(Fox, reacting) Name, tagline, colors, logo, even a social post. That fast.
(Nix, hyped) Ooh, your turn. Give me a good one.

Spoken CTA (doubles as the game):

(Fox) Comment your idea below and I'll brand it in the next video. It's free, search Bran

Caption:

Seriously, comment any business idea and Nix builds the brand. The weirder the better. Fr

Pinned comment:

Drop your idea here and I'll reply with Nix's version. Free to try yourself at brandgobli

SCRIPT 3 — “A designer quoted me \$3,000. The goblin did it in 2 minutes.”

Format: Format 4, before/after transformation. The 34,635-clip study found this is the strongest hook type there is, roughly 2x the views of the weakest. One new prop: a bad hand-drawn logo. Film it third, once you are warmed up. **Length:** ~22s.

On-screen hook (frame 1):

POV: you have a business idea but can't afford a designer.

Shot by shot: - 0:00-0:03 A genuinely bad hand-drawn logo on a napkin, held to the phone in window light. Sound low. - 0:03-0:05 Cut to the app, typing that same idea into the box. - 0:05-0:07 Tap Generate, loading beat. - 0:07-0:16 Reveal montage: name, tagline, colors, logo, sample post, one every 2s. Big zoom on the finished logo next to a tiny inset of the napkin for contrast. - 0:16-0:20 Full kit, static Nix PNG slides in. - 0:20-0:22 Cut to black.

Voiceover:

(Fox, a little self-deprecating) This is the logo I could afford. A real designer quoted (Fox) So I typed the same idea into this instead.
(Fox, as it reveals) Name, colors, a real logo, a launch plan. Two minutes. Zero dollars.
(Nix, warm and proud) See? You had it in you the whole time.

Spoken CTA:

(Fox) It's free, no card. Search BrandGoblin AI.

Caption:

\$3,000 designer quote vs a goblin and 2 minutes. Free, no card. What would you build? #sm

Pinned comment:

The goblin is free to try, no card. brandgoblinai.com. Comment your idea and I'll brand i

Filming order (one batch session): Script 1 first (learn CapCut, reveal montage, auto-captions, Nix pop-in), Script 2 second (same workflow, fast, starts feeding you comments), Script 3 third (same workflow plus the napkin photo). Export each clean from CapCut and repost to Reels and Shorts. Never download from TikTok, the watermark gets buried.

What's next: the moment Script 2 collects its first few "brand my idea" comments, film a true comment-reply, screen-record Nix branding that person's idea with their comment sticker on top, title "Branding your ideas, part 1." That is your Day 8 to 14 engine.
